SUMMARY

An accomplished software engineer who love develop new ideas. Utilizes my capabilities and technical skills to bring out the best of me and to be active flexible in the ever-changing technical environment to be fully devote the exposure in the organization in which I will serve.

WORK HISTORY

2014 - 2015 Internee at Admission Cell, FAST NUCES, Faisalabad. Admissions
2014, Admissions 2015
FAST-NUCES

EDUCATION

2012 - Present B.Sc in Computer Science
National University of Computer and Emerging Sciences

2009 - 2011 Intermediate
Punjab College of Sciences Faisalabad

2007 - 2009 Matriculation
Abbottabad Public School Abbottabad

PROJECTS

1) Crick Predict [Final Year Project]

"CrickPredict" is the project which would help the user to efficiently predict the outcome of any One Day International cricket match. The system predicts the outcome of the match before it starts. Prediction is based on the historical data which is crawled from a well-known cricket website "CricInfo.com" which is a reliable source of cricket data. We worked on many features which might affect the outcome of the match. For prediction purpose we are using classical machine learning algorithms which are Bayesian algorithm and K-Nearest Neighbor's. The user just has to input team names and the Venue and the rest is our systems headache.

2) SnapHit (Semester Project)

SnapHit is an android based application. SnapHit Allows you upload your snap, which is visible to other users, other users will rate your snap and at the end of the event winner will be decided on the rating you have got. SnapHit also Allows you to create an event.

3) Alman's Collection (Semester Project)

The purpose of the project is to come up with electronic commerce system that is simple and secure for users. The system will provide means by which clients can view products browse for more information about the products, select items and collect them in shopping cart then order or buy products online.

4) Online Medical Store (Semester Project)

This project is used mainly for medical stores to maintain the details of medical store such as stock and account. This medical shop management software is so designed as to ease the work load of medical shop professionals. The main feature includes inventory and stock control, accounting, client management.

5) Notepad (Semester Project)

I developed a notepad using doubly Linked list.

6) Games (Semester Projects)

Pacman and Snake and ladder

SKILLS

C++, Java

I have build many semester projects using c++ and java

Html,Css,JavaScript,Bootstrap

I have good knowledge about these languages as i have developed above mentioned projects using these languages.

C#,JQuery,ROR

Beginner

IDE & TOOLS

- 1)Microsoft Visual Studio 2010/2012/2013,
- 2) Eclipse,
- 3) Android Studio

INTREST

- 1) Research on new Technology,
- 2) Learning New Languages and Technologies
- 3) Reading books

LANGUAGES

- 1) Urdu
- 2) English
- 3) Punjabi

HOBBIES

- 1) E-gaming
- 2) Table Tennis
- 3) Football
